

DAMPENING SYSTEM CLEANER II

Fountain System Cleaner

20266

DESCRIPTION

DAMPENING SYSTEM CLEANER II is a most effective product for cleaning and sanitizing all fountain solution blenders, chillers, and circulators. The combination of active cleaners and biological inhibitors will eliminate odors, slime, lint and any other contaminant in the system.

DAMPENING SYSTEM CLEANER II was formulated to remove the contaminants that always build up in fountain solution circulators. The combination of gum, paper coating, and other airborne contaminants will lead to growth of mold, bacteria, and fungus in the fountain solution. Regular use of DAMPENING SYSTEM CLEANER II kills all growth and keeps the system running clean.

FEATURES

- Keeps dampening system clean and odor free.
- All purpose - works with any type of system.
- Easy application - no hard scrubbing necessary.
- Prevents clogs and other problems that can result in downtime.
- Will not harm any press or circulator parts.

DIRECTIONS

Dilute 1 part of cleaner into 9 parts of warm water and circulate for 30 to 60 minutes. Be sure that the cleaner reaches all parts of the system including brushes or spray nozzles. Flush out system with plenty of clean water. Repeat as often as needed.

TECHNICAL DATA

VOC	0.3 lbs./gallon
Glycol ether solvents	1-5 % by weight
pH	6.7
Dosage	1 to 9 in warm water
